

THE EQUINE PREMIUM RANGE IN USE

"Since we have used Protexin Equine Premium Gut Balancer on all of our horses I've noticed that they are all more settled and responsive. Horses travelling frequently maintain better condition and the Acid Ease has really helped Uchin."

Dani Evans,
European Junior Individual Silver Medallist,
Warren Eventing

"Protexin Equine Premium is a brand that we trust to deliver here at Membury, Quick Fix has really helped Ginger with her appetite and condition and is now a regular product close at hand on the yard for when we need a fast acting high dose probiotic."

Laura Collett, European Junior Individual Gold Medallist

"I've known and used Protexin for years, horses thrive on it and maintain temperament and condition much better during a busy travel and show season."

Lynne Bevan, International Show Jumper

*"I have tried Acid Ease on my highly strung Primitive Rising mare Future Phoenix, who is competing at CCI** level. She was prone to weight loss, stress and worry. Since feeding her Acid Ease her condition has improved and her temperament is more settled."*

Emma Humphrey, International Event Rider

"Earthmover really picked up and is now on fire since I tried him on Recover Aid. He's now 19 and Open Team Chasing; he loves it and has never felt better. I couldn't recommend the Protexin Equine Premium products more highly!"

Charlotte Alexander & Earthmover of RoR Lycetts,
A Class Act
(Earthmover, twice winner of The Christies Foxhunter Chase, Cheltenham)

INNER HEALTH FOR YOUR HORSE

From the day we brought horses into work and stabled them we have subjected them to stresses that they associate with a threat and we have triggered their natural response to threat - that is to empty themselves and run away!.....the flight response.

When this occurs the delicate balance of gut microflora is disrupted and depleted. This deficiency will affect the performance and condition of any equine from foal to competition horse, and older horses too.

Protexin Equine Premium is a range of specific supplements, each with a high quality probiotic to help restore the balance of the microflora and therefore to promote effective health, recovery and performance.

Recover Aid
The natural science of recovery

Quick Fix
Natural stress management

Acid Ease
Helping ease gastric ulceration

Gut Balancer
Daily immune support.

Protexin is the leader in animal probiotics and has been a staple product recommended by Veterinary Surgeons for years. Probiotics in the Equine Premium range are specifically developed to survive the transit through the gut and contain no known prohibited substances as defined by The Jockey Club and the FEI. The Equine Premium range contains high quality probiotics along with Protexin's unique Preplex® prebiotic, a food source that nourishes the friendly bacteria and supports beneficial bacterial growth.

RECOVER AID – THE NATURAL SCIENCE OF RECOVERY

Equine Premium Recover Aid is a short course of 14 or 28 days to aid recovery following:

- Strenuous exertion such as a race or competition
- A long journey
- Viral illness or hospitalisation.

It can also be used pre-race or competition to ensure the horse is on top form.

14 x 15g sachets available

Recover Aid contains carefully balanced ingredients to help recovery:

- High dose B group vitamins to help build the blood profile, bolster immunity and help liver function
- Extract of Milk Thistle called Silybin that helps to cleanse the liver and increase function and efficiency
- Vitamins C and E, giving an antioxidant effect and protecting cell structures
- Protexin probiotic and Preplex prebiotic to help restore the microflora balance, aiding efficient digestion and immunity.

Presented as a 'rip and tip' powder in a 15g sachet – one per day added to feed. To help ensure compliance, Recover Aid is dandelion flavoured – horses are known to seek out dandelions when feeling unwell.

QUICK FIX – NATURAL STRESS MANAGEMENT

Equine Premium Quick Fix is a short course of highly concentrated probiotic paste that helps calm the horse in stressful situations:

30ml syringe available

- Travel, particularly long distances, or where the horse gets 'over-excited'
- Settling before competition
- Following worming or antibiotics – where the beneficial microorganisms can be adversely affected.

It can also help new-born foals – establishing microflora in the sterile gut after birth, as well as helping to prevent foal 'scour'.

Quick Fix is peppermint flavoured to encourage acceptance and is presented in a spin-ring / dial-a-dose syringe for accurate dosing. As well as the Protexin probiotic, it also includes Preplex prebiotic to help the probiotic microorganisms grow more effectively.

ACID EASE – HELPING EASE GASTRIC ULCERATION

Equine Premium Acid Ease is a high fibre, probiotic antacid pellet that helps reduce the incidence and severity of the gastric ulceration that can often follow high cereal diets, exercise and stress. It should be used to help horses that:

- Display crib-biting or wind-sucking – symptoms of possible gastritis
- Develop poor coat / condition – particularly if the onset is sudden and unusual
- Become irritable when girthing up, or show a lack of enthusiasm when asked to work
- Have a tendency to be cold backed
- Have loose stools.

5kg and 10kg tubs available

Acid Ease contains naturally soothing ingredients:

- Calcium and magnesium carbonates – antacids just like those available for humans
- Kaolin – a coating agent to help soothe inflammation
- Protexin probiotic and Preplex prebiotic to help restore the microflora balance, aiding efficient digestion and immunity.

Presented as a 5kg or 10kg tub of pellets that are added to feed, the product has been trialed and tested at Lambourn and The Royal Veterinary College, and has been shown to reduce gastric ulcers by 50% and the severity of remaining ulcers by around 30%*.

GUT BALANCER – DAILY IMMUNE SUPPORT

Equine Premium Gut Balancer is a daily probiotic supplement to help bolster natural immunity.

300g, 600g, 3kg, 6kg tubs available

It is ideal for horses that don't 'do' well, as well as stabled horses that compete at any level and senior / veteran horses. It helps ensure the gut microflora is optimised for immune system support, and that nutrition is fully absorbed for maximum energy release.

Containing only Protexin probiotic and Preplex prebiotic on a grass meal-based powder, Gut Balancer is a regular supplement to help ensure every-day good health.
